Herbs that Tonify Qi

Most disorders of qi deficiency involve the Spleen or the Lungs, as these are the two sources of post-natal qi.

- **Spleen Qi Xu:** lethargy, weak extremities, poor appetite, abdominal pain, loose stools, diarrhea
- **Lung Qi Xu:** S.O.B, weak voice, pale complexion, spontaneous sweating
- **Heart Qi Xu:** irregular pulse, palpitation

When Spleen qi is deficient, the Spleen may fail to transform fluids resulting in edema and fluid retention.

When the Spleen is deficient, it may fail in its function to raise the clear yang, result in certain “sinking” conditions, such as organ prolapse.
